

Music Curriculum

We follow Charanga which is a world-leading, cloud-based digital music education platform used globally by tens of thousands of schools. At its core, the Charanga Musical School programme provides a fully sequenced, weekly primary music curriculum for children from Nursery up to Year 6.

Instead of teaching music through text or theory alone, Charanga is built on an integrated, practical, and child-led approach. Every digital lesson features high-quality backing tracks, interactive whiteboard visuals, and customisable digital tools. Lessons are structured around six-step units that weave together the core strands of musicianship: listening, singing, playing instruments, improvising, composing, and performing.

INTENT

We aim to foster an inclusive, lifelong love of music by delivering a high-quality, spiral curriculum where every child can "feel musical". Through diverse musical genres and traditions, pupils build foundational skills in listening, singing, playing instruments, improvising, and composing.

IMPLEMENTATION

Music is delivered through weekly, sequenced lessons using the Charanga program, which balances practical exploration with progressive learning. Lessons seamlessly integrate the interrelated dimensions of music, technical vocabulary, and hands-on instrument practice alongside wider school performance and enrichment opportunities.

IMPACT

Our students develop into confident, expressive performers and critical listeners who can articulate their musical choices using subject-specific vocabulary. Progress is measured through ongoing performances, digital evidence, and pupil voice, ensuring children leave prepared for their next stage of musical education.
